LUCINDIPENDENTE

The journey is the metaphor of our way of working.  
A journey inside light.  
A journey that started ten years ago  
and that led us to visit wonderful places.  
We started with BULBS (the bulb),  
Then we went on  
meeting DIFFUSION (light to furnish),  
TOOLS (tool light),  
ARCHITECTURE (no-drawn light)  
ZERO (hidden light)  
And the last step, OUT (light outside).  
BULBS, DIFFUSION, TOOLS, ARCHITECTURE, ZERO, OUT  
Are our main collections,  
our basic lights.  
The main components of the project  
are simplicity, emotion, creation, and duality.  
Duality is a very important concept to us.  
like Enacita, we think  
all things come about according to light and need.  
We like to think that beauty originates from opposites.  
That's why we often talk of black and white,  
of male light and female light, of emptiness and height,  
of dot and line, of getting or letting go.  
We think light has its gender.  
Sometimes it's female, sometimes male.  
To us, projecting means to "use" opposites.  
The company not only is set on projecting lightening  
bodies but on projecting light, as well.  
An extremely motivated team offers lighting  
technique and scenographic advice services.  
Sited in Piacenza, and showroom in Milan via Medici 13,  
Davide Groppi is a designers' collective Especially  
qualified in the realization of interior architecture  
and temporary installation.
